Pathways

Adult care worker

Provides personal care and support to adults, promoting wellbeing and independence.

Domiciliary care worker

Delivers care and support to clients in their own home, assisting with activities and personal tasks.

Healthcare assistant

Supports medical staff by assisting with patient care, performing basic medical tasks, and ensuring comfort.

Senior adult care worker

Supervises and supports care workers while providing direct care to adults handling complex needs.

Reablement support worker

Helps individuals regain independence after illness or injury through support and rehabilitation.

Residential support worker

Assists individuals living in residential settings with daily activities, offering emotional and practical support.

Community support worker

Provides support to individuals within the community, helping them access services and maintain independence.

Residential care manager

Oversees the operations of a residential care facility, ensuring high quality care and regulatory compliance.

Team leader

Supervises and coordinates a team of workers, ensuring efficient and effective service delivery.
